Business Profile

Packaging Distributors Owner and MD has been involved with the manufacturing and supply of packaging products in the , FMCG, Beverage, Agriculture, Confectionary, Household, Personal care and other market sectors, from SME to Blue Chip organizations, for more than a decade.

The company specializes in supplying high end products such as metal closures, complex 7-layer pouches, high end carton packaging, heavy product containers, plastic pallets, crates and other plastic products.

Packaging Distributors not only manufactures or sources products from South Africa for its clients, but uses its extensive global networks to source the most affordable and best solution packaging for its global clientele

Over the years it has become know that we design the correct packaging solutions for our clients rather than just supplying packaging products. It is not always the most cost-effective solution to just follow market trends or common practice.

Given the opportunity we will design the most optimal, secure, cost effective and professional looking packaging, which will allow your product range to stand out amongst the opposition.

Our motto is “Don’t be a follower, be a leader in the way you package your products”.
